Description

With the **My E-Thermostat System**, composed of **TTD800** digital thermostatic heads and an HUB **TTD5000**, you can "make your radiators smart": you can program TTD800 on a schedule of **7 days and 24 hours** and control them locally, using the buttons on the thermostatic heads, or with your smartphone, via an **APP for Android and iOS systems**.

TTD800 digital thermostatic head allows to control the flow of water through the radiator which they are fitted to, but it can't control the boiler. It is easy to use, thanks to the five buttons on it. The M30 x 1.5 universal connection make it compatible with almost all valves (adaptors sold separately).

Moreover, If linked to a **HUB TTD5000** (sold separately), it can be control with an APP for Android and iOS systems.

Also, TTD800 can be programmed on a schedule of **7 days and 24 hours**.

This kit consist of 3 TTD800 and an HUB TTD5000.
