Description

TTD800 digital thermostatic head allows to control the flow of water through the radiator which they are fitted to, but it can't control the boiler. It is easy to use, thanks to the five buttons on it. The **M30 x 1.5 universal connection** make it compatible with almost all valves (adaptors sold

separately).

Moreover, If linked to a **HUB TTD5000** (sold separately), it can be control with an APP for Android and iOS systems.

TTD800 can be programmed on a schedule of **7 days and 24 hours**, manageable in half hour slots. With our thermostatic head you can use two kind of programs, Comfort and Energy Saving, choosing your perfect temperature.

TTD800 will help you to save energy.

Each digital thermostatic head detects the opening anche the closing of the window in the same area. TTD800 will turn off the radiator, saving energy. Thanks to your new thermostatic head will **save 30% of electrical and heating consumption**.
