## Description

Heat/Cool meters are devices designed to detect the thermal energy supplied by a source, measuring the temperature variation between the system inlet and outlet. Connected to the <u>meter with magical/optical sensor</u>, it communicates the data detected to the <u>MyVirtuoso Home</u> system. Ultrasonic Heat/Cool meters are also ideal devices for **Building Automation systems**, where hourly consumption monitoring is required.

## Why choose SmartDHOME meters?

**Our ultrasonic meters** are devices dedicated to all professionals who want to provide an excellent customer experience to their customers. Below are the main reasons why you should choose them.

- They maintain the same millimeter accuracy throughout the life of the product. This leads to precise measurements over time.
- The detection of anomalies, which negatively affect the measurement, is done quickly and repairs will be just as fast.
- Data collection is carried out remotely, this allows an efficient redistribution of resources.
- They have no mechanical parts, therefore they are not affected by wear and require minimal maintenance.
