Description

The single jet water meter is a **MID certified** device that uses the rotation of a turbine magnetically transmitted to the indicator (dry) and complies with the directives 2004/22/EC and the European standard EN141554. The device is made with anti-corrosion materials, **protected against magnetic interference**, stable in the long-term count and **guarantees minimum pressure drops**.

Why choose SmartDHOME meters?

Our ultrasonic meters are devices dedicated to all professionals who want to provide an excellent customer experience to their customers. Below are the main reasons why you should choose them.

- They maintain the same **millimeter accuracy** throughout the life of the product. This leads to precise measurements over time.
- The detection of anomalies, which negatively affect the measurement, is done quickly and repairs will be just as fast.
- Data collection is carried out remotely, this allows an efficient redistribution of resources.
- They have no mechanical parts, therefore **they are not affected by wear** and require minimal maintenance.
